

Sale Name: September 9th Horse Auction

LOT 41 - Valerie - 2.5yr - 14.3HH - Filly

ELA Soundness Policy Covered

Registered No

Breed GRADE - Not Registered

Story I purchased Valerie as an 18 month old (vet confirmed) last year to be used as my cow horse. I spent a month on her for ground work and when she was where I wanted her to be she was turned out for the winter in a group of older ranch horses. Since then we have taken on two hay leases and 2 more grazing leases and do not have the time to devote to a horse. She has had 75 days with a trainer. He spent the first half month on the ground with her and began riding her in the arena around the third week. Since then he has been using her to work cows, trail ride and arena work and I asked him to start ... Valerie is PSSM positive.

I purchased Valerie as an 18 month old (vet confirmed) last year to be used as my cow horse. I spent a month on her for ground work and when she was where I wanted her to be she was turned out for the winter in a group of older ranch horses. Since then we have taken on two hay leases and 2 more grazing leases and do not have the time to devote to a horse. She has had 75 days with a trainer. He spent the first half month on the ground with her and began riding her in the arena around the third week. Since then he has been using her to work cows, trail ride and arena work and I asked him to start working on her to rope. He is working on putting some reining work on her for the auction as well. It was important to me that she leave with a solid foundation and well

under saddle. She stands great for the farrier, is used to four wheelers and kids, log trucks, tractors, everything you will find on a cattle ranch. She does not like goats. She is going to excel in cattle work. I was told she has smart little Lena and peppy San badger in her pedigree and she was bred and raised on a ranch. She is not a pushy mare and did great with our herd of older geldings. hallcattlecompany@yahoo.com. ****We have just been informed that Valerie has tested positive for PSSM. The owner states that she has never had an episode and has been rode hard on the ranch for the last 75 days.**** Your welcome to visit with the vet on site to discuss PSSM.
