Our vet checked his teeth (no

need to float yet) & said he has a great heart and lungs on October 19th. We bought him in July and do not have a lot of history on him. He is a companion to a pasture horse, they bonded really quickly, although he is the dominant one. It is going to be hard to separate them. Mr. Bigg needs to be worked. We have not ridden him much and he likes to work. He has good strong energy and responds really well to men. He is a good horse, I may be just too soft for him without the time to work him as much as he needs. Angel - (541) 451 - 0125
